28	Objective 10: Publi Health Registration Date (required for all providers)		Example 1: Practice A - registered with Maine's PH registries on February 1, 2014. All providers working at that practice were listed in the PH registration and will use the February 1, 2014 date. If a provider joined Practice A in March of 2016, the practice will add this new provider to any current PH registries that apply to the provider's scope of practice. The new provider can meet any registry requirement for MU that is applicable and the date they will use is the original date the practice was registered – in this example 2/1/14. The practice registration meets the requirement with the original registration date as it is prior to the new providers reporting period and the new provider is added by proxy.
29	Enter MU reporting period and dates for 2016	Enter the start and end date for the provider's 2016 MU reporting period. Please note: There is currently a pending rule change that will allow all providers to submit a 90 day MU reporting period for 2016. We expect a	The MU reporting period is for either a 90 day period or 365 day period dependent on the CMS rule in effect for the program year and what year of submission this is for the provider.

As of 2015 the Maine CDC Cancer registry is considered a specialized registry.	If an exclusion or alternate exclusion is used the provider must answer all three public health measures and meet or exclude to pass objective 10.
31	Exclusion for Public Health Registries		If a provider is eligible for any exclusion (does not give immunizations, etc.) they will need to answer all 3 measures by either meeting or excluding to meet the objective.

		specialized registry.	
32	Objective 1 - Protect Patient Health Information	Enter the date the Security Risk Analysis (SRA) was completed or reviewed. Click here for SRA tip sheet	When you are completing the MU wizard for program year 2016 you will need to enter the date the SRA was completed or reviewed.
33	SRA completed for the 2015 program year	The SRA or a review of the SRA must be completed for each program year. We did not collect the date for the 2015 program year.	Please enter the date the SRA or review was completed for the 2015 program year. We will update our records with this information.
34	50% of all your encounters occur in a location(s) where CEHRT is being utilized.	Numerator - Please state the number of encounters rendered by the provider during the reporting period that were rendered at a location(s) with CEHRT. Denominator- Please state the total number of encounters rendered by the provider during the MU reporting period. Please note that this should be the provider's total for all locations. Threshold = 50%	This is answered per provider. Example: Dr. A sees 100 patients during the MU reporting period. All encounters occurred at locations with CEHRT; the numerator is 100 and the denominator is 100, which equal 100%. If a provider sees patients at a site without CEHRT they will need to add those patients into the denominator to determine the percent.
35	80% of all unique patients have their data in the EHR during the EMR reporting period.	Numerator - Please state the amount of unique patients seen during the MU reporting period by the provider that had data maintained in the EHR system Denominator - Please state the amount of unique patients seen during the MU reporting period by the provider. Threshold = 80%	This is answered per provider. The unique number of patients seen during the reporting period can be found in the provider's MU reports for Objectives 8 and 9. That denominator will also be the denominator for this question. You will need to determine of those patients how many have their data maintained in the CEHRT to determine the numerator.
